

STEGOS – WIRELESS  
BOUNDARY MICROPHONE

## STEGOS – WIRELESS BOUNDARY MICROPHONE

### WIRELESS FLEXIBILITY

Microphone placement is wireless. No annoying cables to clutter the table. The encrypted transmission is in the ISM frequency band approved world-wide.

## STEGOS – PERFECT AUDIO FOR YOUR VIDEO CONFERENCE

### A VIDEO CONFERENCE WITHOUT AUDIO – UNIMAGINABLE!

Successful dialogues in your video conference depend on one factor – the spoken word. The optimal microphone is of great importance to ensure that each word is heard by all participants. Use Stegos to experience maximum flexibility and reliability – for single-user applications, small discussion rounds or large video conferences.

### LONG OPERATING TIME

Rely on Stegos everyday. An operating time of more than 14 hours allows for longer conferences without recharging concerns.

### SHORT CHARGING TIME

Charge Stegos in only two hours with the supplied power adapter. Fast, convenient, ready when needed.

### STATUS INDICATOR

All participants at the conference will immediately recognize the activated microphone due to the illuminated operating button.

### FREE FROM INTERFERENCE

The discussion transmission will not be interfered with by other radio signals. The excellent isolation of the microphone ensures that vibrations and impact sound from the conference table are not transmitted.

### COST SAVING

Due to the low power consumption of the receiver and the use of rechargeable batteries for the microphone, your energy cost will be minimal.

## GLOBAL MUTE FUNCTION

When you have to discuss confidential details with the participants at your table without the video conference partner listening to this discussion, Global Mute is the solution. This feature of Stegos allows you to mute local microphones by pressing the button of one Stegos microphone unit. After the confidential discussion, return to normal discussions by pressing the button of any microphone.

## PRIVACY

Regarding privacy and security, beyerdynamic does not compromise. With the intelligent transmission method and the digital encryption your conferences remain private.

## PLUG & PLAY

Use the Stegos immediately. The delivery of your Stegos package includes different connecting cables to connect Stegos to all popular video conference systems of the market.

## SETTINGS

Change the properties of your wireless boundary microphone via software. The simple user interface makes the setting very easy.

## MEDIA CONTROL SYSTEM

Stegos is comfortably operated when connected to your media control system – such as the volume control or status inquiry of the microphone batteries.

## SUSTAINABILITY

With Stegos you invest today in a long-lasting quality product “Made in Germany”. When considering a system you decide about price, performance and use, which must be in proportion to the future operating costs. beyerdynamic is constantly working to reduce the power consumption of their products and applying intelligent rechargeable battery technology. We meet your requirement and the environment is protected.

### ECO FRIENDLY

- Eco friendly production in Germany
- Rechargeable batteries avoid battery waste
- Operation with rechargeable NiMH batteries (no hazardous waste)
- Low energy consuming receiver (power consumption 3 W at maximum)
- Switch for complete power off
- Compliant with RoHS and WEEE

## COMPONENTS

- Stegos TB – WIRELESS BOUNDARY MICROPHONE  
Supplied with power adapter for charging or operation.
- Stegos RS – RECEIVER FOR BOUNDARY MICROPHONES  
Supplied with antennas and cables for video conference systems. USB cable and software for configuration.

One receiver allows the simultaneous operation of up to four microphones. Up to three systems can be operated independently in neighbouring rooms.

### OPTIONAL ACCESSORIES

Remote antennas and antenna cables are available for more sophisticated installations.

## ADVANTAGES AT A GLANCE

- Wireless and flexible
- World-wide approval, without licensing fee
- Plug & Play
- High standard for privacy and security
- Global Mute function for muting microphones for side discussions
- Microphone status visible for all
- Optimal intelligibility of speech
- Eco friendly operation
- Saving operating costs
- High-end quality
- Maintenance-free operation
- Long operating time
- Compatible with video conference systems
